Experience

TMRW House of Brands (Aditya Birla Fashion) · Bewakoof, Nobero, TIGC, Wrogn
Associate Product Manager Nov 2025 – Present
Product Management Intern Jul 2024 – Oct 2025

- Own the Bewakoof.com **checkout and homepage roadmap** (~200K daily sessions); shipped **GoKwik Checkout** in staged rollouts: **10.5% lift in session conversion**.
- Led **Dynamic Homepage**, auto-ranking content on six audience homepages. Live test: **13.8% higher tap rate**, **5.4% higher homepage-to-order conversion**.
- **Work directly with brand and merchandising teams** across the brands: build the tools they use daily and improve storefronts from their requirements and feedback.
- Run the **experimentation program**: **30+ A/B tests across four brand stores**; define success metrics, read results and drive rollout decisions.
- Led the 0-to-1 **C&C Platform**, an AI content engine taking brand teams from creative brief to approved copy and images, with tiered evaluation and human review.
- Launched **WhyBuy**, AI product imagery and video for Shopify, live on **2,000+ products across six brands**; built with the brand teams who use it.
- Built **Helios**, a multi-brand analytics command center with plain-English querying, and **Homepage Lens**, showing reach, CTR and conversion beside each homepage element.
- **AI-native workflow:** run AI agents daily for research, prototyping, spec drafting and analysis; built a RAG copilot for PRD writing and review.
- Use SQL funnel diagnostics to find checkout failures, tracking gaps and marketing inefficiencies; present findings and decisions in CXO business reviews.
- **As intern:** revamped the Bewakoof homepage with Stories and personalized shelves; shipped Urbano PDP offers and cross-category recommendations, lifting **AOV by 6.5%**.

Hyphen SCS | Warehousing and supply-chain startup Noida
Product Management Intern May 2023 – Nov 2023

- Co-led a **warehouse management app** from design to launch, streamlining day-to-day warehouse operations.

Projects

ABF T-Shirt Studio | AI merch app for a live corporate event Jul – Aug 2026

- Attendees described a design, AI drew it and they ordered on the spot, feeding a live print queue; shipped in **three weeks**, **500+ orders**, **1,000+ concurrent users**.

Deal Flow & Portfolio Intelligence | AI deal-flow assistant for a VC firm Jun – Jul 2026

- Automates pitch triage from inbox to Notion and lets the investment team ask questions of portfolio P&Ls in plain English.

Shunya Virtual Jury | AI judge for a live awards show Jul – Aug 2026

- Listens to team pitches, asks spoken follow-up questions, and scores and ranks teams against the jury's criteria.

Agentic Creative Generator | AI art director for D2C ads Aug 2026

- Lets a designer pick the best elements of past ads, then drafts the brief and generates the new creative, with a human approving each step.

PDP Story Pipeline | Product-page storytelling 2026

- Turns a Shopify product and its photos into a **10-frame editorial story** for the product page, without a new shoot.

Creative Suite | E-commerce content SaaS (prototype) Apr 2026

- Lets brands generate on-brand product content, route it through approvals and publish to Shopify, with subscription billing.

Spotify Chains | Personal tool, open source Oct 2026

- Turns listening sessions into playlists automatically, one per uninterrupted chain of songs; free to run for up to five people.

Impact
